Related Categories: General Info

We usually talk about technology in our newsletters. In these unprecedented times, keeping yourself and family safe is incredibly important. There is a ton of information from the CDC, WHO, CMC, and other "alphabets" on the practical side of what to do.

We and others have come across the following video for your consideration:

The video was shot at home - it's Facetime or equivalent. It's not professionally done, but the presenter, David Price, is a Weill- Cornell ICU physician who has been in their ICU daily in New York City since this all began and knows precisely how to keep himself safe. He is speaking with his family and friends. I think he now has over 2Milion friends. The video is 57 minutes long and well worth your time.
